DETAILED ACTION

Response to Amendment

1. The amendments to the claims and specification, in the submission dated 8/3/06, are acknowledged and accepted.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a holographic recording method comprising the step of projecting a reference beam and an object beam onto a holographic recording medium wherein the holographic recording medium is rotated in an optical axis plane including the incident optical axes of the reference beam and the object beam in a plurality of stages with respect to the point of intersection while keeping an incident angle of the object beam constant.

Group II, claim(s) 7-8, drawn to a holographic recording apparatus comprising: a control device for synchronously controlling the rotating mirror and the rotating stage.

Group III, claim(s) 9-20, drawn to a holographic recording medium wherein the diffraction gratings are recorded by deflection multiplex recording so that a plurality of diffracted light beams generates in different directions when a reproduction reference beam is applied at an incident angle of the incident optical axis of the reference beam at the time of recording.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

For each of Groups I-III above, each of the listed groups has special technical features not required for the other listed groups. The special technical features exclusive to each group are listed above in the listing of the groups.

4. A telephone call was made to Kirk Berkheimer (703-836-6400) on 7/1/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
